# RESUME

# DEMIAN CALDELAS
## Fullstack Senior Software Developer

Senior Software Developer with a rich experience spanning over a decade in the tech landscape. I've transitioned from traditional stacks to cutting-edge web-based solutions, notably within the JS/TS/React/Next ecosystem. I'm an avid admirer of Next.js and all that's powered by Vercel. Adaptable and versatile, I've made contributions to both startup innovations and vast enterprise operations.

In my personal life, I'm a fervent sports enthusiast, deeply passionate about football and tennis. I'm the proud father of two wonderful girls who've taught me the nuances of patience and understanding. I love playing guitar in my free time, watching movies, and delving into books. My ever-present curiosity always pushes me towards the next big thing in tech.

- ♌ SCRUM
- 🔗 ASANA
- ⚖ AGILE

## EXPERIENCE

**Nov 2022 - Aug 2023**
@modern.tech | relevate
### LEAD SOFTWARE DEVELOPER

Directed the shift from a 40-year-old desktop system to a state-of-the-art web-based Association Management System (AMS) tailored for the client's B2B real estate customers. Initiated the project with a solo discovery phase and subsequently led a team of six to execute the innovative solution, leveraging a Next.js stack.

---

**Apr 2022 - Nov 2023**
@modern.tech | showingly
### LEAD SOFTWARE DEVELOPER

Led a team of six in evolving Showingly's platform, streamlining the scheduling process for showings among real estate agents. Enhanced features for brokerage user administration, expanded analytics tools for staff and integrated several third-party services. Utilized a JS/TS stack with CRA and Redux, supported by a serverless backend using AWS Lambda, Atlas Realm, and MongoDB.

---

**Oct 2021 - Apr 2022**
@calendso
### SENIOR SOFTWARE DEVELOPER

Played a pivotal role at Calendso, which was rebranded to Cal.com, a Commercial Open Source scheduling platform rivaling Calendly. Participated in the rollout of its core features and introduced a plugin-like system, enabling users to personalize their experience. Collaborated within a cohesive team, utilizing a Next/React/TS stack and a serverless architecture.

---

**2016 - 2020**
self employed
### FREELANCE SOFTWARE DEVELOPER

Served a variety of clients as a freelance software developer, delivering tailored solutions across multiple projects and industries over a 4 to 5-year span. Onboarded into several tech stacks, showcasing versatility and commitment to meeting client needs. Successfully transitioned from a Ruby on Rails focus to a JS/TS/React ecosystem, demonstrating adaptability to the rapidly changing tech landscape.

---

**2007 - 2013**
@accenture | bank of galicia
### SENIOR SOFTWARE DEVELOPER

Engaged with Accenture, aiding 'Banco de Galicia' in Buenos Aires. Rose from Junior to Senior Developer and Team Leader. Worked in dedicated teams overseeing customer bank accounts and loans, enhancing both technical skills and financial sector insight. This role set the groundwork for advanced tech industry positions.
